Technology Binder

Practical Technology Planning for Later Life

This binder is designed to help individuals and families keep important technology information organised, accessible and understandable. It provides a practical overview of devices, accounts, digital services, important contacts and technology arrangements so that family members can more easily assist during illness, emergencies or major life changes.

For security reasons, avoid storing plain-text passwords directly in this binder. Instead, record where passwords are managed and how trusted family members can access them if required.

This binder was created using **Solved Tech Support Technology Planning Software**, which is provided for your personal or household use. You are encouraged to share your completed Technology Plan with trusted family members or others who may need it, but please don't copy, share or distribute the Technology Planning Software or blank planning materials.

If you know someone who would find Technology Planning useful, please refer them to **Solved Tech Support**. Visit www.solved.net.nz/technology-planning or call **Suzanne Levy** on 021 530 900.

Digital Life Instructions

Instructions for how you would like aspects of your digital life and technology to be managed when you are no longer able to manage them yourself.

I am happy for my family to access my phone and computer to find all the files and photos they need, please wipe the devices before selling or giving them away. Bambam would really like the phone...
